- FUCHS *Fördertechnik* AG -

- FUCHS *Fördertechnik* AG -

Our company building, located in Oststeinbek near the Hamburg harbour

Our history

Since the company was established in 1963 as a trading agency a rapid development has converted **FUCHS *Fördertechnik* AG** into a company with an extensive range of material handling technology for the shipbuilding sector as well as for the offshore and land based industries.

Our present intentions

Today **FUCHS *Fördertechnik* AG** is a worldwide operating company with individual user oriented systems.

A continuous development program is pursued to meet latest demands of the marine and offshore industries, and the company's designers tailor the products to special customer requirements.

Special subject is the development and production of engine room cranes, telescopic rails and monorail trolleys with extremely short headroom and hook approaches.

FUCHS *Fördertechnik* AG is the leading company in this market segment in Europe today.

- FUCHS *Fördertechnik* AG -

FUCHS *Fördertechnik* AG

your competent partner for material-handling technology on seagoing vessels.

Take advantage of our experience.

We develop, produce and deliver systems ready to be fitted according to your requirements.

Our experienced engineers will advise you during all phases of the project, from the planning until the final completion.

FUCHS *Fördertechnik* AG

has developed a special product line for Navy vessels and yachts.

This product line contains:

- Helicopter service cranes
- Ammunition cranes
- Telescopic rails for provision
- Cranes for torpedo handling
- Fire prevention wall for helicopter hangar
- Telescopic rails for boats
- Telescopic rails for waterjets

Quality safety and performance

This motto stands for the high standard of quality guaranteed for our products.

On principle, all systems are manufactured in our own factory in Oststeinbek.

They will be delivered after they have been approved by the classification society of your choice.

Quality: “Made in Germany”

(certified by Det Norske Veritas
conform to DIN/ISO 9001)
