INSTAFLEX and iFIT Pipes and Fittings
TO WHOM IT MAY CONCERN

iFIT fittings with INSTAFLEX pipes

We hereby confirm that the iFIT fittings (d16 and d20) to be used together with the INSTAFLEX piping system have been successfully tested and that a new Type Approval Certificate will be issued within shortly covering also these fittings.

The pipes and fittings are approved for use in non-essential systems for water and seawater up to 10 bar. Service temperature 0°C to 70°C (short periods up to 95°C).

Further action: +GF+ will update Type Approval Certificate no. K-2260 to include the iFIT fittings.

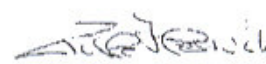

iFIT fittings with iFIT pipes

This system has been satisfactorily tested with the dimensions d16 and d20, and these dimensions may therefore be used on DNV classed vessels (acceptance given on a case-by-case basis).

Further action: +GF+ must decide whether they would like to apply for DNV Type Approval for the iFIT pipes and fittings.

Yours faithfully
 for DET NORSKE VERITAS AS
